Pool Sports A Great Success on Monday Evening

Big Crowd Enjoys Skill of Young Swimmers

The swimming pool was well patronized last Monday evening for the annual gun night held there on that occasion.

A good program of water sports was arranged and all present were delighted with the excellent showing made by the contestants.

Swimming races, long diving and fancy diving, contests were arranged for all ages and each event was fairly well patronized.

The penny scramble for the kiddies furnished a great amusement, with the two score or more of tiny tots scrambling about in the pool with the confidence of grownups.

An interesting event of the evening was the life saving and respiration demonstration given by W. Rickard and W. Kombo of the Boy Scouts from Medicine Hat. This was very cleverly done by Kombo and each movement clearly explained by Rickard. These two boys also gave a fine exhibition of fancy diving and other water maneuvers. The following were the winners:

- Swimming Races**
Boys 8 years and under: Billy Martin, Horace Obar.
Girls 8 and under: Kate Briches, Ruth Lien.
Boys 12 and under: W. Hurt, bet, S. Lanning.
Girls 12 and under: Esther Rexin, Peggy Reid.
Boys 16 and under: Sid Pearson, Ed Schmidt.
Girls 16 and under: Jessie Stratton, Huberta Shaw.
Gentle sea: Jim Lowen, M. Kombo.
Ladies, open: Jessie Stratton, June Mallard.

- Diving Events**
Boys under water swim: John Garraeth, Wilf Hurlbert.
Girls under water swim: June Mallard.
Novelty race: Wilf Hurlbert, D. Lanning.
Boys fancy diving: Ronald Johnson, Harold Congram.
Fancy Diving, open: Sidney Pearson, Ralph Rood.
Ladies fancy diving: June Mallard.

Ruberta Shaw won one of the hidden treasures and Bill Pearson the other.

LOOKS LIKE DOMINION ELECTION NEXT SUMMER

With four federal by-elections scheduled for September 24th and a likelihood that parliament will recess late in October for the sixth and final session, the political scene seems doomed to be short lived.

Although it has been impossible to secure any official comment, the report has persisted for some time that the government will call parliament in the fall, recess for a month or six weeks at Christmas, and prorogue in April. The clocks would then be cleared for dissolution and a summer of campaigning for the general election.

Bray Lake Picnic Was Great Success

Large Crowd Present From The Surrounding District

Farmers and Ranchers of the Bray Lake district held their annual picnic last Saturday and it proved to be one of the most successful for several years past. All roads appeared to lead to Bray Lake during the day and during the afternoon a large crowd had assembled from all districts for miles around.

A good program of sports, foot races etc. for old and young was most successfully carried out by the committee.

A feature of the afternoon was a ball game between Jenner and Bray Lake, two old time rivals. This was closely contested throughout and the game was in doubt until the last ball was thrown, the home team winning out by 13 to 12.

The day's program was brought to a close with a big dance in the evening. The dance hall was taxed to capacity to accommodate the crowd and as the music was excellent all thoroughly enjoyed the event.

The committee in charge of the day's program are to be congratulated on the great success of the event.

MRS. BRYDLE'S FATHER DIED IN MONTREAL

Mrs. A. Brydle received the sad news of the death of her father Mr. John Webster, in Montreal, after a lingering illness he was 73 years of age. Besides his widow who is a cripple, deceased leaves three sons and two daughters, Allan, Billy and Mrs. G. Rogers of Montreal, Fred, in Toronto and Mrs. Brydle, here. There are also several grandchildren and three sisters. Mrs. L. E. Morrison, of Brooks, formerly of Medicine Hat, is a sister.

Redcliff Reminiscences

Taken From The Review File of July 30th, 1915

There is not a poor crop in the whole country around here. Mr. Mac Moffatt has wheat 3 feet 8 inches high and oats almost 4 1/2 feet high.

The farmers of the Bowell district have undertaken, through U. F. A. to raise enough money to provide a field gun and place it at the disposal of the Dominion Militia Dept.

Miss Leslie Fairbairn entertained a number of her girlfriends on Thursday afternoon in honor of Miss Bertha Congrove who is leaving shortly for the East. K. C. Colter umpired the girls' baseball game and there were no casualties.

The Greenhouses here are doing a big business these days in ripe tomatoes. They are shipping at the rate of 1500 pounds a day and next week this will be increased to 2000 pounds daily. The entire crop is being shipped to one firm in Saskatoon and even this does not supply the demand.

A WASTE OF EFFORT

U. F. A. members of the legislature, newly sworn in members of the cabinet and the U. F. A. weekly paper appear to be falling over each other in their endeavor to vilify the character and reputation of the two former members of the cabinet who were left out in the shuffle.

Unless they can produce and carry through some definite proof that their brief in behalf of their unfortunate comrades, is genuine, they should drop them out of the picture and get down to business. The Hanna Herald sums the situation up very nicely when it says:

"Unfortunately for Mr. Brownlee and Mr. McPherson, their names were connected with sordid incidents. It may be that political antagonism inspired the array of elaborate court cases undertaken against them. We do not know. The blackening process through which these two men went, whether justifiable or not, was sufficient to damn them both politically. Both were good Administrators and are able men. But political success requires an absence of such incidents."

The U. F. A. government might be well advised to forget the past as far as possible and look to the future. It will gain little to continue to support the cause of the men who are now out of the government. If there were delinquencies, it was not the government's fault, and if there were none then the men were peculiarly unfortunate. Lengthy and persistent defenses put up on behalf of them will accomplish little."

Dr. and Mrs. Allan and small son of Regina and Mrs. Allan's mother, Mrs. Morrison of Brooks spent last Wednesday in town on their way home from Calgary and Banff where they have spent the past six weeks. To visit Mrs. Allan's cousin Mrs. A. Brydle and Mr. Brydle. Mr. Morrison spent the remainder of the week here visiting her niece, Mrs. Brydle, before returning to Brooks.

Churches

GORDON MEMORIAL UNITED CHURCH
Pastor: Rev. R. E. Keatinge
Sunday, July 29th.
10 a. m. Church School.
11.15 Morning Service.
Subject: "Kadijah Barnes."
The Gateway to the Land of Promise.

8 p. m. Service at Bowell.
No evening service.
"It is God's presence that makes the world sublime and beautiful."

ST. MARY'S CHURCH

Celebration of Mass every Sunday of each month except first Sunday, at 8:30 a. m.

ST. AMBROSE CHURCH
Rev. H. S. Hannett, Vicar.
9th Sunday after Trinity.
July 29th. The entire crop is being shipped to one firm in Saskatoon and even this does not supply the demand.
Matins 11 a. m.
Evening 7:30

Additional Locals

A new vegetable canner is to be put in operation in Taber this autumn, according to a C.P.R. pamphlet.

Sid Worts, of Piapot, is spending part of his holidays here with his parents Mr. and Mrs. G. H. Worts.

Grasshoppers are showing up in great numbers around town lately. So far no serious damage to gardens has been reported.

The town staff has been busy during the past week cleaning the weeds off the streets. Main thoroughfares now present a very tidy appearance.

Mrs. W. Campeau, apt Tolo, accompanied by Mrs. Campeau's niece, Miss Vivian Strobel, motored to Maple Creek on Tuesday. Mrs. Campeau and daughter will return on Sunday.

A. G. Mett has secured a contract for a section of road work on the government highway in the Bow Island district. He left here last Monday with his outfit and will commence operations at once.

While engaged at his work at the Brick & Coal plant last Saturday, W. Hill met with an accident when a large chunk of coal fell on his leg. Fortunately no bones were broken but the leg was badly bruised.

Most of the private properties in the residential section of the town are now looking their best. Not only have most properties been greatly improved by additional trees shrubs and flowers but vegetable gardens of which there are a goodly number, are doing exceptionally well this season.

Ester— On Wed. July 25 1934 to Mr. and Mrs. E. Ester a son.

Mr. and Mrs. Jones of Los Angeles, spent Wednesday in town, the guests of Mr. and Mrs. R. C. Hargrave.

'Manhattan Melodrama' Comes to Monarch

The Picture Dillinger Risked His Life to See

New York's smart night movie before the camera in a glamorous and dramatic parade in "Manhattan Melodrama," new Metro-Goldwyn Mayer three star feature which opens Thursday next at the Monarch Theatre.

Clark Gable, William Powell and Myrna Loy share starring honors. "Manhattan Melodrama" presents Gable as a powerful and dramatic figure of the demit world of New York, a "big shot" gambler who does not hesitate to use violence when he is crossed. He is in love with Miss Loy who is the wife of William Powell, district attorney and Gable's life-long friend.

The situations that arise out of this unusual combination of characters make a story that moves swiftly and dramatically to an unexpected conclusion.

Legion Auxiliary Holds Annual Picnic

Entertain Legion Members and Families to Outing

Yesterday the local auxiliary to the Legion held their annual picnic for the families of members of the Legion. At one o'clock cars lined up in front of the club rooms and a merry lot of youngsters were soon on their way to what proved a most enjoyable and successful outing.

The picnic was held in Central Park, Medicine Hat, where a good program of sports and games was carried out during the afternoon.

The children got their fill of ice cream, soft drinks, sweets, etc. during the afternoon and in the evening a fine supper was served in real picnic style.

As the weather was ideal for a picnic everything was carried through without a hitch. Much to the credit of the committee in charge. The youngsters as well as their parents thoroughly enjoyed the outing.

The Chicago Police Kill John Dillinger

Shot To Death as He Came Out of Theatre

John Dillinger, the long sought fugitive Indiana desperado, was shot to death by Chicago police outside a city theatre last Sunday night. It is said his whereabouts was betrayed by a woman. As he came out of the theatre police closed in on him and fired volley as Dillinger reached for his gun. Three bullets hit him, one in the neck and two in the body.

Mr. and Mrs. Robt. Marty celebrated the 58th anniversary of their wedding on Tuesday night. During the day many friends called on them to extend congratulations. Mr. and Mrs. Marty are both still enjoying their usual good health and it is the wish of their many friends here that they may enjoy many more such anniversaries.

JUST FOR FUN

"Say, Esther, do you know how they summon the deaf mutes to dinner at the asylum?"
"No, how?"
"They ring dumb-bells."

Customer— "Waiter, there is a button in my soap."
Waiter— (ex-printer) "Typo graphical error sir, it should be sutton."

Little Ads— "Mother, shall I run out and post this letter?"
Mother— "No child, certainly not. It's pouring in torrents and not fit to turn a dog out of doors. Let your father go."

"Yes, my friend," said the theological professor, "some admire Moses who instituted the old law; some, Paul, who spread the new. But after all which character in the Bible had the largest following?" As he paused, a voice from the back bench shouted, "Annanias!"

Regular Meeting of Town Council Last Monday

Was Held in Council Chamber Last Monday

Council met in regular session last Monday evening with Mayor Cox in the chair and councillors Brydle, Broughton, Sanderson, Newham and Sangster present.

G. H. Worts and Dr. Ward waited on Council as a delegation from police dog owners in town and protested against the contemplated action of Council to raise the tax on this breed of dogs. It was pointed out that owners of such dogs had gone to considerable expense to improve the breeding and they contended that mongrels were very often more dangerous than this well bred class. The delegation was not opposed to destroying vicious dogs but thought it unfair to penalize all owners of such dogs because a few were causing trouble.

On motion of Councillor Broughton and Newham it was decided that all dogs be kept under control in future, according to the town bylaw.

A firm in Calgary wrote asking for list of machinery town has for sale and price of same. The matter was left to councillor Brydle, chairman of the water committee, to investigate.

On motion of councillor Brydle and Broughton the accounts as passed by the finance committee were approved for payment.

The question in connection with the taxes on the Airport building was left over till next meeting for investigation.

More applications from ratepayers, asking to take advantage of the Tax Consolidation Act, were received.

T. Fitzhugh requested that he be furnished with a more suitable wagon for scavenger work. The matter was left with the public works committee with power to act.

'Should Ladies Behave' at Monarch Theatre

Lionel Barrymore and Alice Brady Triumph—A Riot

Place a much divorced philanthropist, a young impressionable girl looking for "experience," a silly, simpering, giddy wife, a suave, continental lover and a suspicious husband together under one roof for a hectic weekend and you have an idea of the hilarious and sophisticated situation which makes up the plot of "Should Ladies Behave," which comes to the Monarch theatre Monday, Tuesday and Wednesday as the latest Metro-Goldwyn Mayer's successful farce comedy. In its juxtaposition of mixed romances, love, hate and jealousy, the picture is funny enough and with such talented players as Lionel Barrymore, Alice Brady, Conway Tearle, Katharine Alexander, Mary Carlisle and William Janney, filling the leading roles, the various amusing incidents are played to the full.

A Great Mystery

Mountains That Breathe Is Great

Peace To Scientists
Out in the land of Arizona, richest archaeological storehouse in the two Americas, according to a statement credited to the Smithsonian Institution, there is one mystery which these modern readers of the mysteries of the rocks have not yet deciphered. It is the "breathing mountain."

In that region slashed through by the Grand Canyon, there once was a great plain. There followed a period of terrific volcanic disturbances during which the earth labored and brought forth a few hundred mountain peaks. One of these peaks known as Old Bill Williams is the "breathing mountain."

Old Bill, despite his appellation, is quite a youngster, as mountains go, and residents of the town of Williams, sleeping peacefully at its base, are not quite sure whether they should sleep peacefully in the lap of a breathing mountain, so recently as spouting volcanoes.

In addition to the lava and ashes which are the common products of an active volcano, Old Bill Williams once sent forth great quantities of almost pure carbon. Earthquakes struck these clinders down to the valleys, and so it is that the town of Williams rests above a bed of carbon covered over both from forty to a hundred feet of lava, rock and soil. These clinders are the mountain's lungs.

Citizens of Williams have a unique sewer system. They dig holes, some four feet in diameter, down into this bed of clinders, and all that remains is to turn the sewage into these holes and the sewage disposal problem is solved.

But when sinking these holes, it is as though they drilled into the lungs of a monster sleeping giant. When the drill breaks through the clinder, usually a gush of air or gas is up-taken, to be followed later by an intake of equal proportions. Thereafter the inhalation and the exhalation is quite regular, but on a scale which might be expected from a giant a thousand or more times larger than man. The intake may last for hours and likewise the exhalation.

"Where comes this 'breath'?" You've asked a poser. Some say it is the wind playing upon clinder mountainous mounds. Some say it is a product of things unseen beneath the earth.

It is a mountain that breathes just taking a catnap, or is he asleep for good? The people of Williams, Arizona, would like to know.

Strange English Village

Has Seven Inhabitants And Covers Only 200 Acres

Eldon, a village in Hampshire, four miles from the market town of King's Somborne, has neither shop, school, public house, nor any other normal village acquisition does it boast. But Eldon is proud of itself. Its assets include seven inhabitants—one of them a young girl, a farm, two cottages, and a church. The whole village covers only 200 acres. The church, bereft of a steeple, and looking like a small barn, is only 35 feet long, with an old bell operated by a piece of wire, six pews, and a font no bigger than a tea-cup. A single gravestone adorns its churchyard, where cattle graze at will. Only once in the last three hundred years has it seen a christening, a marriage or a funeral. And each of these three events took place beyond the memory of the present inhabitants.

Twin Sisters Ninety-Two

Two sisters at the remarkable age of 92 in the mark established by Mrs. Jon Dart and Mrs. Brenton Jones in New South Wales. These ladies are claiming no record, but they were at put out not long ago when a couple of 82-year-old "youngsters" called themselves the identical twins in the Maritimes. They were born in Brentwood, N.S., and have since written a few notes to each other in Colchester county all their lives.

Rare Paper Money

The world's largest collection of rare paper money, the "Avenmore" collection in London, comprises 46,000 bank notes issued by more than 100 countries during several centuries. It includes the note with the highest face value—five million taels in marks—and the oldest note in the world—issued in China about 700 years ago.

Filaments of the first electric lamps were made of carbon.

W. N. U. 2054

SOUTH AFRICAN BATTLEFIELD FLORISSING GREETED BY THE KING

Our picture was taken in the grounds at the back of Buckingham Palace and the King and Queen can be seen receiving the party of South African pilgrims who have journeyed to Europe to visit the battlefields of France and Flanders. With the King and Queen are Col. Thackeray, Earl Jellicoe and Mr. J. H. Aldred, who is the leader of the pilgrims.

Unified Empire Air Force

Plan Does Not Meet With Favor Of British Government

The British government turned down a motion for a unified Empire air force. Lord Londonderry, minister for air, frankly told the house of lords the government had lost hope in the disarmament conference. The situation unhappily had become all too clear, he said.

"We can no longer hope an international convention will solve the problems which agitate the whole of Europe," said the minister.

"His Majesty's government therefore have decided they can no longer delay the steps that are necessary to prepare adequately for the air defence of these shores."

He referred to the government's decision, announced some time ago, to build up the Royal Air Force to 111,111 as big as any other air force in the world.

But the government could not accept the motion submitted by Viscount Elibank, which urged the creation of an imperial air force and the summoning of a special imperial defence conference to consider the question, the minister added.

Lord Londonderry pointed out that the defence resolution adopted at the imperial conference of 1923 recognized that it is for the preponderance of the several parts of the Empire, upon the recommendation of their respective governments, to decide the nature and extent of any action which should be taken by them.

Training School For Dogs

Potomac Has Provided Many Blind Soldiers With Guides

A training school for blind men's dogs celebrated the tenth anniversary of its foundation in Potomac recently. During the past ten years the school has provided hundreds of blind Germans, especially soldiers, with dogs scientifically trained in the office of bodyguard and guide. At present there are forty dogs in the school preparing for their final examination. The majority are purchased sheep-dogs two to three years old. The course lasts three months. The first and hardest lesson the dogs have to learn is to lead or at least not to show their interest in their fellow-kind. Loyal disregard, they are taught, must be the answer to another dog's barking, for the blind man's dog barks only to signal danger. When the dog has learned all its examinations its master-designate comes to the school and himself spends three weeks there so that master and dog understand each other before they come to depend entirely upon each other.

Producers' poultry pools, where farmers assemble and make ready their own poultry for shipment to market, are growing in popularity and utility in practically every province of Canada. These pools started in Western Canada and now Eastern Canada is falling into line.

The chief of all big forming plants is epigramm, commonly known as pea toad.

Less than 80 years ago, tomatoes were called "love apples" and cultivated for show, not for food.

Flowers On Ocean Liners

All Big Ships Have Expert To Look After Them

About a year ago we ran a little squib about a lady sailing on the Aquitania whose husband sent aboard a collection of corgie bouquets one for each day of the trip. As our story went, the lady was in a quandary what to do and consulting her steward, was assured that the flowers would be nicely cared for by "the gardener."

"His Majesty's government therefore have decided they can no longer delay the steps that are necessary to prepare adequately for the air defence of these shores."

He referred to the government's decision, announced some time ago, to build up the Royal Air Force to 111,111 as big as any other air force in the world.

But the government could not accept the motion submitted by Viscount Elibank, which urged the creation of an imperial air force and the summoning of a special imperial defence conference to consider the question, the minister added.

Lord Londonderry pointed out that the defence resolution adopted at the imperial conference of 1923 recognized that it is for the preponderance of the several parts of the Empire, upon the recommendation of their respective governments, to decide the nature and extent of any action which should be taken by them.

Should Not Be Surprising

How Of British Peers Took To Make A Living

Antoinette was expressed that the son and heir of a British peer should be found working for a living, as a laborer in England and for a wage of 111 a week.

Why this should be found surprising we do not see. Lords must eat, and neither Providence nor the State makes any special provision for their support. The son of a peer may lose his money or his job or both, in the way of common people. That is the right sort of chap he looks for a job or another job, which is what was done by the lord who figures in this cabled story—Ottawa Journal.

May Be Solomon's Mines

Scientists Have Found Old Workings Near Dead Sea

Copper mines worked by King Solomon's slaves have been unearthed in the region between the Dead Sea and the Red Sea by an expedition of American scientists, according to a report submitted to the American Society of Oriental Research at the University of Pennsylvania.

Ruins of furnaces and buildings, heaps of slag and open veins of copper mark the site of the ancient mines.

Has Numerous Titles

Mountie in Yukon Obligated To Perform Many Duties

The "pooh bah" of the Royal Canadian Mounted Police is Superintendent T. B. Cuthbert, stationed at Dawson City, in the Yukon, according to the annual report of that force tabled in the House of Commons. Superintendent Cuthbert, in addition to being officer commanding, performs also a variety of other functions.

He is immigration inspector, inspector of fisheries, inspector of weights and measures, sheriff of the Yukon territory, registrar of vital statistics, justice of the peace, coroner, commissioner for performing marriages, clerk of the court and acting superintendent of Indian affairs.

Superintendent Cuthbert, however, has a competitor who runs him almost neck-and-neck. This is the officer commanding at Alaskan, in the North West Territories. Superintendent C. E. Rivett-Carnac.

May Be Solomon's Mines

Scientists Have Found Old Workings Near Dead Sea

Copper mines worked by King Solomon's slaves have been unearthed in the region between the Dead Sea and the Red Sea by an expedition of American scientists, according to a report submitted to the American Society of Oriental Research at the University of Pennsylvania.

Ruins of furnaces and buildings, heaps of slag and open veins of copper mark the site of the ancient mines.

The period was fixed by Professor Nelson Chubb of the Hebrew Union College, Cincinnati, Ohio, who heads the expedition, through fragments of pottery excavated in the ruins.

Nine thousand lead pencils could be made from the cinders in the human body.

Every aluminum alloy has been perfected in England for automobile bodies and engines.

Administration Of Justice Too Tardy

Halifax Judge Scores Unnecessary Delays In Law

After 57 years on the bench County Court Judge George S. Patterson of New Glasgow, finds fault not with his fellowmen nor with English law, but with the administration of justice.

The veteran jurist told a Halifax service club that liberties of Magna Carta, granted at Runnymede in 1215 by King John and since maintained as a guarantee of personal liberty to British subjects, were being violated in civilized Nova Scotia every day.

He scored "unconscionable and unconstitutional" delays in the administration of justice in both civil and criminal courts, recalling the case of a girl who had remained in the town jail at Guysboro without trial from October until May, when a grand jury found "no bill" because there was no evidence to support the charge.

"Delays in justice are not the fault of British law," the judge declared firmly. "The fault is in the administration of the law."

The same applied to civil cases, he continued. In his own county of Pictou a farmer in the spring, finding that others had cut wood on his land, would be lucky to get a decision within a year if he took civil action.

Old Trade Is Flourishing

Firm in London Is Lull Turning Out Drums

There is one old London trade that flourishes like the green bay tree. It is the making of drums and all the accessories of military pomp that go with them.

It was discovered through hearing to the fact that the British Service club that he was going to look at a new set of drums before they go out East to help regiments.

"Merry rather than more punishment should be the watchword."

What's In A Name

Story About Violins Proved Beauty Of Melody Deserves On Player

Over the radio recently a violinist who owns a Stradivarius violin played a melody upon it, then repeated the melody with an ordinary violin or "biddle" costing about \$100. The result was that the radio listeners to hear in and say which was the \$500,000 instrument and which the \$100 one.

Eleven per cent did not notice any difference, 54 per cent, guessed the \$100 violin was the \$500,000 one, and 35 per cent gave the right answer.

A few years ago a firm of violin makers in London named Hill invited a committee of experts to judge between a Stradivarius violin and one of their own make from stock. A skillful musician played on the two instruments behind a screen. The unanimous decision of the committee was that the Hill violin was the Stradivarius.

All of which goes to show that this old master fetish is largely an matter of taste. The instrument does not matter so much as the "soul" that the player puts into the performance.

A soulful musician can make a homely violin or piano sound like a benediction from Heaven, whereas an ordinary player on a Stradivarius or a Steinway couldn't stir any emotion in a listener.

The same goes for art. Pictures may hang in a private collection or in a store for years and not attract attention from the connoisseur, then suddenly somebody discovers upon it the name of a famous artist who has been dead a hundred years or more, and immediately it becomes of fabulous value. Nothing has been done to it to alter its appearance. It remains the same old picture or the same old one as before.

Ballons Made In Canada

Used for special experiments in connection with the Picard stratosphere flight at Chicago on July 1, were manufactured by the Sterling Rubber Company in Guelph, Ontario.

The balloons, ordered by the University of Chicago, were completely inflated have a circumference of something over 50 feet, and are the largest of their type ever manufactured in Guelph.

If a girl grows up and does not marry the man she chose for her in childhood, she becomes a "man-woman" in Albania; she dresses like a man, bears arms, and can inherit property.

A railroad train sank in quicksand near Pueblo, Colo., in 1875, and never was found.

What Is Culture?

Something More Than Study Of Books States College Head

"If a boy reads in Latin the section of Virgil's *Georgics* on bees, he is supposed to be acquiring culture; but if a boy on the farm is taking care of bees and studying them at first hand, he is just doing a job. Why is that? asked Dr. H. D. Hunt of Macdonald College, addressing the convention in Montreal of the Quebec Women's Institutes on the subject, "What, then, is Culture?"

To identify culture with the reading of books was, in the speaker's opinion, to take too narrow a view. There must be certain qualities of personality which, when developed, will result in culture.

Qualities essential to culture in the speaker's mind were intellectual alertness and curiosity, or "desire to know," coupled with a spirit of skepticism, or "wanting to be shown." "Don't be too ready to be swept off your feet by the brass band," Dr. Hunt warned his hearers.

Sensitivity to beauty and to ideas, and a sympathy that makes it possible to understand the feelings and aspirations of others were other qualities stressed.

Given these qualities, culture will result, said Dr. Hunt. But the right environment is an important factor in its development. Hence the importance of the libraries, churches and other associations, which provide the environment in which these qualities can be developed.

WORLD HAPPENINGS
BRIEFLY TOLD

Mrs. Marie Curie, co-discoverer of radium, died July 4 in a sanitarium at Valence, France.

A trade accord between the United Kingdom and Bolivia has been initiated and will be signed in a few days.

John C. Slater, one of Prince Albert's earliest school teachers, died at his farm home six miles east of the city, aged 81. He came from 'Galt, Ont.'

Winings from sweepstakes or lotteries will be forfeited to the crown under the bill amending the Criminal Code which was given third reading in the House of Commons.

President Roosevelt has signed the legislation granting a partial assessor moratorium on paying off farm mortgages and the bill for a retirement pension system for railway employees.

The French destroyer Vauquelin will visit Canada during the summer to participate in the celebrations of the 400th anniversary of the arrival of Jacques Cartier in the St. Lawrence valley. It was announced.

The Pacific seaboard's first international air line is now in service with the extension of the United Air Lines San Diego-Seattle passenger-express route to Vancouver. Through connections at San Diego, the line links three countries: Mexico, the United States and Canada.

Formal opening at Peoria, Ill., of its \$5,000,000 distillery, the largest in the world, was announced by officials of Hiram Walker and Sons Company, Canadian distilling firm. The new plant will turn out 100,000 gallons of whiskey a day and its daily grain consumption will be 20,000 bushels.

The U.S.S. Wilmington, warship, steamed into Toronto harbor, under command of Admiral Leahy, carrying the message of the Canadian parliament, seized by American forces during the war of 1812. It was returned to the Ontario government as a mark of friendship between the two nations.

Recipes For This Week

(By Betty Barclay)

PICNIC SALAD

(Serves Six)

1 lettuce
3 cups orange pieces
3 deviled eggs
Stuffed olives
On lettuce covered salad plates arrange mounds of orange pieces. In to each mound place half of a deviled egg which has been sliced lengthwise. Cut side down to up. Garnish with slices of stuffed olives. Serve with mayonnaise in lettuce cup at side of plate.

ORANGE CREAM CUSTARD

(Serves Six)

Mix together thoroughly and cook in double boiler until thickened:
1 egg yolk, beaten
1 cup sugar
2 tablespoons flour
1 teaspoon salt
1 cup orange juice
1 cup cream (or evaporated milk)
Add:
1 teaspoon ground orange rind
Cool and turn into serving dish over:
1 cup orange slices
Chill. Cover with meringue made of:
2 egg whites, stiffly beaten with
4 tablespoons sugar
Decorate with additional orange slices.

Brief Career For Society

National Anti-Scandal Idea Did Not Last Long

A brief obituary notice in the London Times tells of the death of an idea as well as of a man. A few years ago the Rev. Frank Melville, vicar of Exhall, founded the National Anti-Scandal Society, which almost immediately had a countrywide membership. Its members received a badge bearing a likeness of the three wise monkeys and the legend, "Hear no evil, see no evil, and hear no evil." At its most vigorous period the society's membership could be counted only in the hundreds, but it was made up of enthusiasts. Why did it dwindle away and come to nothing in just a few years? It is about by Mr. Melville. The Times observes that Mr. Melville was "noted for his outspoken views and his humor."

The world's largest known copper deposit, in Chile, is estimated to contain 700,000,000 tons of ore.

New Zealand is void of snakes or poison insects.

Praise For Canadian Nurses

Have High Reputation in Britain And Are Well Known

A tribute was paid to Canadian nurses by Miss Edith Rose, interviewed at Montreal on her way to attend the Canadian Nursing Association convention in Toronto. Miss Rose said that Canadian nurses have a high reputation in Britain, where they have become known through the constantly increasing interchange of nurses.

The standards of nursing in Canada and Britain, Miss Rose remarked, are much higher than those of some countries of Europe, where nursing is a very new thing. The proposed founding of a Florence Nightingale scholarship was referred to by Miss Rose, who expressed the hope that some Canadian nurses would compete for and win it.

Little Journeys In Science

(By Gordon H. Guest, M.A.)

The story of how a young German scientist discovered a valuable insecticide is most interesting. In far away Japan, in the 17th century, a Japanese nobleman's daughter, who was married, and to this celebration was invited a young German scientist.

It was the usual Japanese custom of those days to decorate each house entirely with one kind of flower or blossom. In one room the young scientist observed that no insects were flying around and that the floor was strewn with dead flies, ants and other typical summer pests. This room was decorated with a Seven o'clock flower.

Permit me to take a few of these flowers to his laboratory. After many experiments with pyrethrum and similar flowers, he discovered that the scent given off by them killed insects and other creeping pests, but was harmless to humans. His discovery has been of great value to all nations in the exterminating war against insect pests. To-day this little "field insect" is widely cultivated in Japan, and its blossoms, compressed and packed in bags, are shipped to all parts of the world to be used in the manufacture of insect powder, which is used chiefly in the home.

About the most helpful thing on earth is an automobile seven miles from a filling station with its gasoline tank run dry.

A GOOD CATCH

Above you see a photo of Bill Hay, the famous angler of Amos 'N' Andy radio team, with a couple of "king fish," otherwise spring salmon, caught at Victoria, where Mr. and Mrs. Hay have been spending a most enjoyable holiday getting, motoring, and above all, fishing.

Bureau Of Research Suggested

Okanagan Member Lays Plan Before B.C. Government

Creation of a provincial research institute for scientific investigation of modern and by product trends in all industry, and more particularly to develop outlets for the basic primary products of British Columbia, is being suggested to the provincial government at Victoria, B.C., by Dr. J. Allen Harris, M.L.A., South Okanagan, himself a research chemist.

Dr. Harris suggests that a modest start be made with the plan to supplement what already is being done in the way of scientific research in B.C. industry. In accommodation at the University of British Columbia, without the expense of new building, he proposes that the province launch the nucleus of a provincial research institute, which would be wholly apart from student activities at the university.

CHARMING ENGLISH STAR IN HAPPY MOOD

The horse is said to speak with "six words and three kinds of neighing." Cats produce 15 sounds, according to the experts, each with its distinct interpretation. There are 12 "words" in the hen's vocabulary and five in the rooster's.

Japan's New Submarine

The Japanese Navy's new submarine, the I-70, has been launched. The new vessel has a displacement of 1,638 tons. Its engines of 6,000 horsepower will propel it at a surface speed of nineteen knots. Before the launching of the I-70 Japan's submarine tonnage was given as 72,294, well over the 52,700 ton limit imposed by the London naval treaty.

Small Pet Effective

The parliament of the Isle of Man has just brought down its budget showing a surplus of \$320,000 where only \$25,000 had been estimated. The practical result is a reduction of the income tax rate from ten pence on the pound to eight pence.

Courtesy consists of a man running after a girl until she catches him.

About 2,000,000 tons of water pass over Niagara Falls every minute.

Heat Energy In Straw

Process For Storing Gases Being Studied By Scientists

A hint that we are overlooking the existence of an immense supply of energy in some of the waste products from farms, is revealed by C. H. Bailey, a scientist of the University of Minnesota, who addressed an organization of flour millers and cereal chemists at Toronto recently.

Mr. Bailey made the statement that chaff and straw in Canada and the United States was capable of producing more heat than all the asphaltic coal produced in the United States during a year.

There have been numerous experiments in Western Canada in efforts to utilize the straw resulting from the annual harvest. Several times it was said that a process for storing gases from burning straw had been perfected, but this proved incorrect and so far as is generally known the tremendous quantities of wheat straw in Western Canada and the United States are still a total loss and have to be got rid of by a wasteful process of burning in the fields.

The chemists recognize that heat is a potential source of power. Millions of tons of wheat straw are annually consigned to the flames in the agricultural areas of Western Canada, and the United States. If the energy thus liberated could be stored in some way the country would be possessed of enormous reserves of power to do essential work. To-day science is very alert in the study of these problems. It may be that one of these days this problem will be solved and a new source of revenue will be provided for the western farmers, who are badly in need of such a boon.

Animals Have Vocabulary

Phrase "Oo Dumb Friend" Was Always A Lie

The average man or woman who likes animals and is convinced that his or her pet understands a half dozen familiar commands may be surprised to learn that several "animal dictionaries" have been written. Charles D'Aunne, the Italian poet, has announced that he will include a complete glossary of the animal world in his new book "Lives of Illustrious Dogs." The book is to be modeled after Plutarch's "Lives."

Other animals whose vocabularies have been recorded, are the monkey, the horse, and the cat. An American, Miss Fletcher, who was employed, was responsible for classifying 32 terms of the chimpanzee, together with the meaning of each. Other scientists have tabulated 12 words of the Marmoset language and 34 of the Gibbon's.

The horse is said to speak with "six words and three kinds of neighing." Cats produce 15 sounds, according to the experts, each with its distinct interpretation. There are 12 "words" in the hen's vocabulary and five in the rooster's.

Britain's Public Men

Versatility Is Quality That Makes

Britain is truly blessed in the character of her public men. In her ambassadors and representatives abroad Sir William Clark was not merely a trained civil servant with a grasp of trade and economics. He was a cultured man of the world with a cultivated mind, one who was as much at home as he was happy in discussing the poets as in analyzing the statistics on the export of lumber. That quality, the quality of many-sidedness, of versatility—it is the English concept of education—appears to be the thing which makes the Englishman so successful.

The British "Clark" goes to South Africa, will occupy there the post that he held here. In that great field of duty and responsibility Canadians will wish for him all the success and prosperity his talents can hardly fail to win—Ottawa Journal.

The new railway depot at Kington, Middlesex, England, is built of brightly-colored enameled metal. Shingles and tiles are in the fittings and the platform is flood-lighted.

Interesting Local Items

The local softball girls played a game in the Hat last Thursday evening and lost out by a score of 21 to 19 to Safeways.

Obeah's garage front has been greatly improved in appearance by a fresh coat of red paint with white trimmings.

Miss Frances Buchholz underwent an operation for appendicitis in the Medicine Hat hospital last Thursday. She is now progressing favorably.

Miss Smith, of Drumheller who was taken to the hospital while visiting her sister here, was sufficiently recovered to return to Mrs. Sangster's last Sunday. Mrs. Smith is also visiting Mrs. Sangster.

Mr. Oakland's flower garden on Third street is being greatly admired by passers by these days. The lot is very artistically laid out and the profusion of bloom attracts the attention of everybody. The garden is a treat to look at and shows what can be done with a little care and attention.

A very pretty wedding took place in the Catholic Church, at Tilley last Saturday morning when Mr. Jos. Krizon of Redcliff was united in marriage to Miss Antonia Rexa of that district. A number of friends of the groom from Redcliff attended the wedding. Mr. and Mrs. Krizon will reside in Redcliff.

A miscellaneous shower was held in the parish hall on Tuesday afternoon, by some of St. Ambrose ladies, in honor of Ms. Maie Hill, a bride elect of August. A pleasant hour was spent at cards for which Mrs. W. King won first prize. Miss Hill was the recipient of many pretty and useful gifts for which she thanked her friends in fitting terms. Dainty refreshments were served and a very pleasant social time enjoyed.

IN LOVING MEMORY
of a dear husband and father, Charles E. Oakland, who died in Col. Belcher Hospital, Calgary July 27th, 1924. Still to memory dear. From his loving wife and sons, Edward and David.
